Incorporated Organisation with Registered Charity Number: 1194239. Address: Kaleider Studios, 45 Preston Street,  
Exeter, England, EX1 1DF.*

Date: 25.04.2022

To whom it may concern,

Danny volunteered with us for our first pop-up exhibition in March 2022, hosted in Maketank, Exeter. The exhibition was on the theme of climate modelling on Earth and other planets. We had 32 volunteers over the 8 days of the exhibition, with approximately 8 volunteers working each day. Volunteers had various roles and Danny joined as an 'on-hand scientist' and spent 3 full days overseeing the Solar System zone of the exhibition. He was a real asset to the team. His role involved demonstrating the interactive elements of the zone, answering questions and helping to promote interesting discussions with the visitors. Danny demonstrated great skill in communicating complex ideas in a clear manner and with simple language, using basic demonstrations to help communicate complex science. He was also very good at promoting dialogue, as opposed to purely one-way dissemination. He was knowledgeable, enthusiastic, reliable, good-humoured and hard-working and we really appreciated all the time he gave to the role. On our feedback board, Danny was mentioned frequently by name for giving good, clear explanations.

**Organisation information:**

Exeter Science Centre is an educational charity working to connect the public with STEAMM (Science, Tech, Engineering, Arts, Maths, Medicine) research and industry in the South West and, in parallel, working to create a STEAMM Discovery centre in Exeter.

Sincerely,

Dr Alice Mills

Co-Founder and Co-Director of Exeter Science Centre
